CS—032

(Following Paper ID and Roll No. to be filled in your Answer Book)

**PAPER ID : 1043**

Roll No.

--	--	--	--	--	--	--	--	--	--

**B.Tech.**

EIGHTH SEMESTER EXAMINATION, 2004-2005

**ADVANCED CONCEPTS IN DATABASE SYSTEMS**

Time : 3 Hours

Total Marks : 100

**Note :** (i) Attempt *ALL* questions.

(ii) All questions carry equal marks.

1. Attempt *any four* parts of the following : (5×4=20)

- What is query processing ? What are the steps involved in query processing ?
- What is query optimization and why is it needed ?
- Explain how heuristic query optimization is performed with an example.
- What are the advantages of cost based query optimization over rule based query optimization.
- Explain system catalogue in RDBMS.

2. Attempt *any four* parts of the following : (5×4=20)

- What are the advantages and disadvantages of the object oriented database model ?
- What is logical containment of relationships ? What is class hierarchy ?

CS—032

1

[Turn Over]

- (d) Give a suitable example of An Expert Database System and its advantages.
- (e) What do you mean by Abstract Data Types ? How are they used ?

3. Attempt *any two* parts of the following : (10x2=20)

- (a) How concurrency control is managed in Distributed Database Systems ?
- (b) Explain Fragmentation. How Horizontal fragmentation is different from vertical fragmentation. Give examples of both taking suitable example. Discuss correctness criteria of fragmentation.
- (c) Explain Distributed Deadlock detection and resolution techniques.

4. Attempt *any two* parts of the following : (10x2=20)

- (a) Why is database security important for an organization ? What do you mean by discretionary access control ?
- (b) Who is a DBA ? What are the duties and responsibilities of a DBA ?
- (c) How are roles and privileges granted and revoked ? What is the use of the GRANT command ? What is the syntax of GRANT command ? Explain with some examples.

- (a) What are spatial databases ? and what is spatial query ? Give an example.
- (b) What are the recent advances in web technology ?  
What is open source approach of web technology ?
- (c) What are multimedia databases ? What do you mean by content based retrieval ?
- (d) What are the advantages of data mining and technologies used in data mining ?
- (e) What are compressed image segmentation/representation ?
- (f) What are temporal constraints ? How they are used ?

- o O o -
