Note: Attempt all questions.

- 1 Attempt any four of the following parts: 5x4
 - (a) If relations R and S are reflexive, symmetric and transitive, show that $R \cap S$ is also reflexive, symmetric and transitive.
 - (b) Prove that if R is an equivalence relation then R^{-1} is also an equivalence relation.
 - (c) Given $S = \{1, 2, \dots, 10\}$ and a relation R on S where

$$R = \{\langle x, y \rangle | x + y = 10\}.$$

What are the properties of relation R?

(d) Let $X = \{1, 2, 3, 4\}$ and $R = \{\langle x, y \rangle | x > y\}$. Draw the graph of R and also give its matrix.
