Sub Code:RCAA01

Printed pages: 02

Paper Id:

214306

Roll No:

MCA

(SEM-III) THEORY EXAMINATION 2018-19 INTRODUCTION TO PROGRAMMING & COMPUTER ORGANISATION

Time: 3 Hours

Total Marks: 70

Note: 1. Attempt all Sections. If require any missing data; then choose suitably.

2. Any special paper specific instruction.

SECTION A

1. Attempt all questions in brief.

 $2 \times 7 = 14$

- a. What is polling?
- Explain different types of bus.
- Add the following signed integers-93 and 44.
- d. Differentiate between Algorithm and flow chart.
- e. What is a floating point overflow error?
- f. What is pipeline speedup? http://www.aktuonline.com
- g. Explain about Duality Principle.

SECTION B

Attempt any three of the following:

 $7 \times 3 = 21$

- a. Show that the relation R in the set A of all the books in a library of a college, given by R={(x,y): x and y have same number of pages} is an equivalence relation.
- b. Draw the functional block diagram of a Digital Computer, and discuss its components in brief.
- Explain CISC and RISC architecture of microprocessor.
- d. What are the different data types of conditionals and branching, looping statements? Discuss.
- e. What is the function? Explain the various categories of function.

SECTION C

Attempt any one part of the following:

 $7 \times 1 = 7$

(a) Prove the following by using the of inciple of mathematical induction for all n ∈ N:

$$1^3 + 2^3 + 3^3 + \dots + n^{3-2} (n(n+1)/2)^2$$

- (b) Discuss the following:
 - (i) Ordered sets with example
 - (ii) Types of relation with examples.

4. Attempt any one part of the following: http://www.aktuonline.com $7 \times 1 = 7$

- (a) Differentiate synchronous and asynchronous sequential circuits. Explain the problem in asynchronous circuits.
- (b) Minimize the following standard POS expression using K-map.

$$Y = \prod M(0, 2, 3, 5, 7)$$

5. Attempt any one part of the following:

- $7 \times 1 = 7$
- (a) Explain the Fixed Point and Floating Point Number Representations with examples. http://www.aktuonline.com
- (b) Explain micro programmed CPU organization with the help of a diagram.
- 6. Attempt any one part of the following:

 $7 \times 1 = 7$

- (a) What do you mean by flow chart? Draw flow chart to calculate factorial of given number N.
- (b) What do you understand by the primitive data types? Discus with suitable examples.
- 7. Attempt any one part of the following: http://www.aktuonline.com $7 \times 1 = 7$
 - (a) What is algorithm? Write an algorithm to multiply two matrixes A (3,3) and B (3,3) of integers and store the results in matrix C.
 - (b) Write a note on the storage classes-scope and life time in detail with example.
